## Recent results from the joint oscillation analyses and diffuse supernova neutrino background searches at Super-Kamiokande

*Thursday, 20 February 2025 14:00 (18 minutes)*

In the first part of this talk recent results from the joint oscillation analyses using T2K beam neutrinos and atmospheric neutrinos will be discussed, together with the oscillation parameters which are derived from this study.

In the second part of the presentation the studies on the Diffuse Supernova Neutrino Background (DSNB) at the Super-Kamiokande will be covered.
