

Annual report 2023

Piotr Życki

Bei You, ..., Bożena Czerny, ..., Marek Sikora, ..., PZ; 2023, Science, 381, pp. 961-964

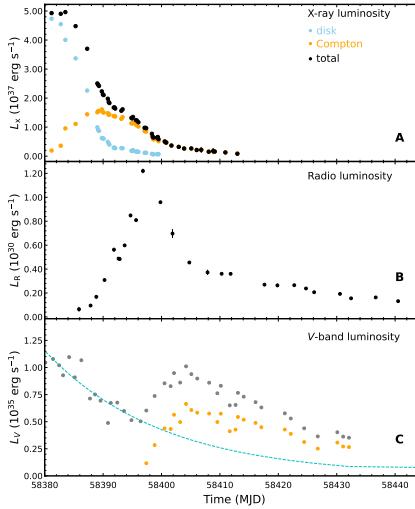

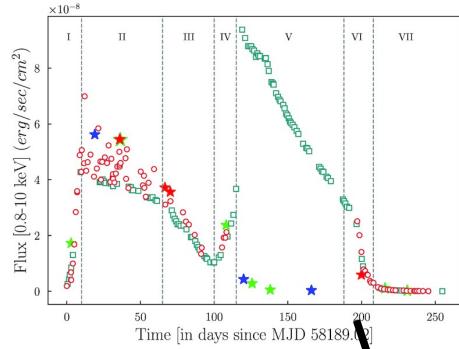

„Observations of a black hole X-ray binary indicate formation of a magnetically arrested disk”

X-ray binary MAXI J1820+070, outburst in 2018

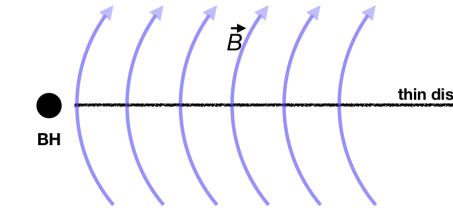

Swift/XRT & NICER data

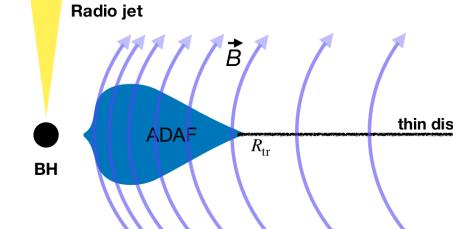

Prabhakar et al. 2022

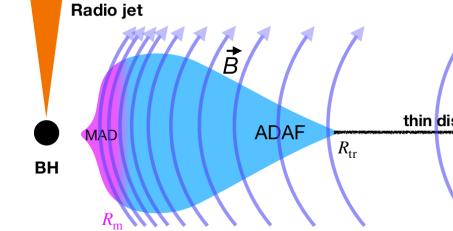

A On set of the flare,
at $t_0 \simeq \text{MJD } 58380$

B Peak of hard X-ray emission,
at $t_1 \simeq \text{MJD } 58389$

C Peak of radio emission when a MAD is formed in the inner region of the ADAF
at $t_2 \simeq \text{MJD } 58397$

Astronomy Working Group – an ESA advisory body

Important tasks in 2023:

- Recommendation for NewAthena
- Recommendation for adoption of LISA
