

MODEST-24: Exploring Dense Stellar Systems Across Cosmic Time

Monday, 19 August 2024 - Friday, 23 August 2024

Nicolaus Copernicus Astronomical Center, Warsaw, Poland

Scientific Programme

Formation of dense stellar systems across cosmic time

Observational properties of dense stellar systems in different environments

Numerical approaches to modelling stellar systems and their constituents

Special session dedicated to Prof. Rainer Spurzem and Prof. Roberto Capuzzo Dolcetta

Stellar multiplicity, exotica, and transients in star clusters

Chris Belczynski memorial session on compact objects and gravitational wave source
